WORK EXPERIENCE

POKEJOIN | Thunder Bay, ON

June 2016 – November 2016

Founder

- Utilized and scaled an open source project to create a high-functioning website
- Website received 120,000 daily page views and reached 6 million unique users
- Declined offers to sell the website and ultimately scaled it and ran it myself
- Re-wrote API's to run the application on Mongo instead of MariaDB for efficiency

MONKEY | Remote

December 2016 – January 2018

Full Stack / Technology Lead

- Created a wire-frame, mock-up concept, and designed website for landing page
- Used modern libraries such as React to develop unique UI elements and animations
- Created and deployed MEAN tech stack for the Monkey Exchange.
- Wrote ERC-20 smart contract for handling basic token functions and supply.

OBSIDIAN PROJECT | London, UK / Remote

January 2017 – April 2018

Front-end Developer

- Developed a website concept for the Obsidian (ODN) cryptocurrency project
- Created a LEMP stack and made staging sites to test deployments
- Developed back-end explorers and displayed stats on homepage with ASP.net
- Used an agile approach to help develop UI flow diagrams

MY PROJECTS

CRIMEKICK | Thunder Bay, ON

April 2018

Creator

- Used API's to map local crimes and create heat-maps and crime density maps
 - Social networking features allows users to self-report crimes
 - Used Python to develop an API that connected users near each other (neighborhoods)
-
